

GBW40 – Grab Bar WingIt w/ 4” screw.

Used to mount WingIt Grab Bars and Shower Seats in hollow walls, WingIts exceed all Building Codes and Government Guidelines when installed per instructions. GBW40 can be used with most Grab Bars manufactured in North America - please contact us with product manufacturer for use verification as their product specifications may change without notice.

Grab Bars and our shower seats install directly onto the WingIts with stainless steel screws (supplied). Grab Bar WingIts are Fireproof and Self-Waterproofing – even over grout lines and under water level. WingIts are American made from 18/8 Stainless.

The WingIt Fastening Technology works in all hollow wall construction. WingIts require a 1.25” hole be drilled into the wall substrate. WingIts are self-waterproofing and self-structural and will not loosen or lose their structural integrity.

CTHS114, Carbide holes saws are available for tile walls – rated at 40 holes in wall tile.
