

## **Installation guidelines for the Counter-Top WingIts (CTW40)**

The Counter-Top WingIt (CTW40) is designed to be used to mount counter tops between two walls.

### INSTALLATION:

- Create 1 ¼" holes at the appropriate locations.
- Clear any debris from within the wall hollow that could interfere with the installation of the patented WingIt Fastening System.
- Remove the inside tape liner and install the WingIt(s) into the wall. Hold securely for a moment to allow tape to bond.
- The screw should be unthreaded a distance greater than the wall substrate thickness. Hit the head of the screw with a hammer.
- Tighten by hand, then with a screwdriver.
- WingIts maintain their coned shape within the wall hollow to maximize load capacities and insure years of use.

Install and tighten the WingIts with the clip as shown in the picture at left.

The stainless steel clip needs to be placed such that the clip is under slung to the WingIt. – This improves the structural capabilities.

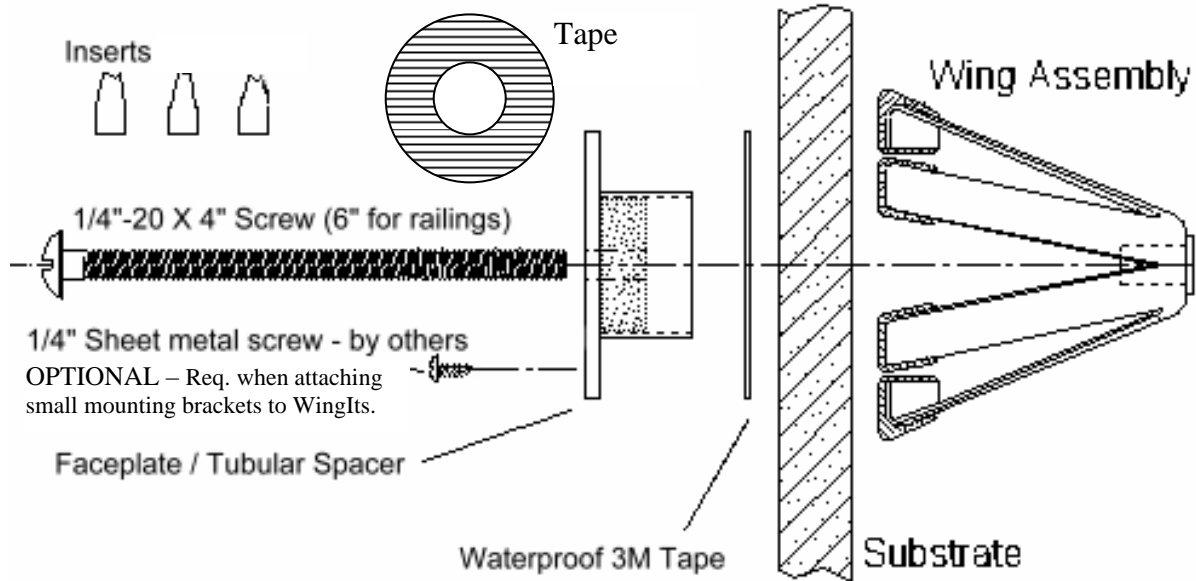

Note that the WingIt must be fully installed and tighten prior to placing the countertop into position as the countertop will conceal the screw that tightens the WingIt.

## **Never Install WingIts into Wet or Deteriorating Walls.**

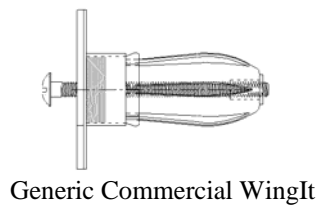

### Notes:

1. Tape rings are supplied, place between the WingIt and the stainless clips to reduce loosening due to torque.
2. Standard WingIts work in substrates up to 1 ½" thick.

**GENERIC COMMERCIAL WingIt ( fire resistant, water resistant )**

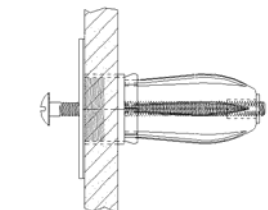

**GCW40**  
 The Wing Assembly is made from Roll Hardened Stainless Steel. The Faceplate/Spacer is made from **LEXAN®**. **Permanent Fastening Solutions from WingIt !**

Generic Commercial WingIt

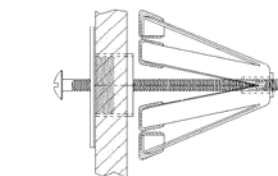

The GCWxx (xx represents screw length) is the Fastening Solution for a myriad of surface mount installations - Commercial Railings / Safety Hand Rails, Baby Changing Tables and Child Seats, Hand / Hair Dryers, Soap Dispensers, Paper Dispensers, Surface Mounted Objects, ADA Mirrors, Hooks, Closet Racks & Towel Racks, and most other Commercial Accessories. WingIts install in minutes – creating a secure, permanent mounting of commercial accessories – Where You Want, When You Want !

GCW40 in Drywall

**FACEPLATE** – 1.9” Diameter x 0.040” thick – hides behind accessories.

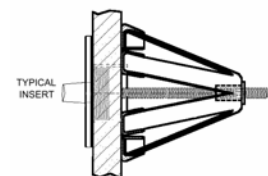

**INSERTS** allow for the secure mounting of Commercial Plastic Handrails and other commercial accessories – Inserts ‘snap’ into the Faceplate and fill mounting hole in the Commercial Accessory – insuring a tight fit.

GCW40 ACTIVATED

**TAPE** – factory applied tape allows for watertight installations, additional tape is supplied to adhere the WingIts to the Commercial Accessory.

**SHEET METAL SCREW** (1/4”) is **ONLY** necessary when fastening single point items that have Mounting Plates, such as Towel Bars – to keep the Mounting Plate from rotating. Screw through the Mounting Plate, into the WingIt Faceplate (works in conjunction with the WingIt’s 1/4”-20 thru bolt).
