

MAINTENANCE OF WINGITS® PHENOLIC AND NAUGAHYDE-TOP SHOWER SEAT & TUB BENCH PRODUCTS

Phenolic is a baked resin-laminated core material with 1/16" thick of Formica bonded on both sides. Phenolic can also be cleaned with household strength, all-purpose cleaners.

Naugahyde is a synthetic material and can be cleaned and maintained with the use of household strength, all-purpose cleaners.

Stainless Steel See WingIts® maintenance of stainless steel section

Coarse abrasives such as sandpaper or steel wool, or any type of bleach should **NOT** be used on Naugahyde, phenolic, or stainless steel.

If you need further information, please do not hesitate to contact us for recommendations on your specific product or project.
