SOLID SURFACE MATERIAL FEATURES & BENEFITS

		
STRUCTURAL	DURABLE	SUSTAINABLE
Designed to be resilient and built to last forever.	Resistant to scratching, heat, fire, water, chemicals and stains.	Made with recycled materials, and is fully recyclable.
Smooth, seamless surface that is more impact-resistant than granite.	Inert, sustainable, non-toxic, non-carcinogenic, chemically non-reactive, fire rated, and nearly indestructible.	Can be renewed and reworked into a brand new product.
		
NON-POROUS	HYGIENIC	REPAIRABLE
Highly resistant to moisture, the hard surface inhibits the growth of bacteria.	Easy to clean, no increase in maintenance costs.	Accidental damage inflicted on solid surface can usually be repaired.
Safe to clean with standard hospitality commercial cleaning agents.	Meets sanitary standards and has antibacterial properties.	Unlike natural stone, small imperfections can be corrected without the need to replace the whole product.
